Dear Ms. Otter:

Enclosed please find the cover page and analytical data for the above referenced project. If you should have any questions, please do not hesitate to call me at (210) 522-5428.

Sincerely,

Michael J. Dammann
Manager

Sample Identification

010004

One hundred and five sets of organ samples for a total of two hundred and eight discrete samples were received at Southwest Research Institute. The samples were logged into the Laboratory Information Management System (LIMS), and each sample set was assigned a unique identification number, referred to as the SwRI Lab System ID. See Table 1 for cross-reference to the client ID. Appendix B contains the chain of custody information.

Introduction

Tissue samples were mounted in a histological wax mount, stained, a microtome cross-section cut and the resulting thin tissue slice placed on a microscope slide and read under a microscope for anomalies by Dr. Gene B. Hubbard, D.V.M., M.S. ACLAM, ACVP Veterinary Pathologist. The samples were examined to determine if the quality of sample specimen was acceptable for further study, and if it was, then the samples were examined for anomalies including but not limited to inflammation, hemorrhage, necrosis, sarcocystis/skeletal muscle, cholangiohepatitis, interstitial nephritis, parasites, mineralization, neoplasia or if the sample was essentially normal. Anomalies were graded via the following guide: 0 - Normal, 1 - Minimal, 2 - Mild, 3 - Moderate, 4 - Moderate/severe, 5 - Severe. The resulting matrix of observations are presented as several tables indicating the sample identification and type (liver, kidney etc..) as well as any observed anomalies. Appendix A contains this table summary.

Discussion

No lesions were recognized in the kidneys. All liver lesions were basically of two types; either a minimal increase in lymphocytes in portal and parenchymal areas and generally a gradation of focal to multifocal lesions consisting of acute necrosis, granulomas and finally mineralization in predominately portal areas. The latter lesions are generally associated with parasites and both tapeworm larvae and cross sections of nematode parasites were seen histologically. Lymphocytic inflammation is generally associated with viral infection. Serologic profiles would possibly help to define the viral disease burden. In summary these tissue changes are similar to those seen in the prior tissue submission and would be essentially what one would expect to see in a wild mouse population.

Comment:

Histology – No lesions were recognized in the kidneys. All liver lesions were basically of two types; either a minimal increase in lymphocytes in portal and parenchymal areas and generally a gradation of focal to multifocal lesions consisting of acute necrosis, granulomas and finally mineralization in predominately portal areas. The latter lesions are generally associated with parasites and both tapeworm larvae and cross sections of nematode parasites were seen histologically. Lymphocytic inflammation is generally associated with viral infection. Serologic profiles would possibly help to define the viral disease burden. In summary these tissue changes are similar to those seen in the prior tissue submission and would be essentially what one would expect to see in a wild mouse population.

Microscopic description: See attached spreadsheet

Microscopic diagnosis: See attached spreadsheet

Comment: Histology – No lesions were recognized in the kidneys. All liver lesions were basically of two types; either a minimal increase in lymphocytes in portal and parenchymal areas and generally a gradation of focal to multifocal lesions consisting of acute necrosis, granulomas and finally mineralization in predominately portal areas. The latter lesions are generally associated with parasites and both tapeworm larvae and cross sections of nematode parasites were seen histologically. Lymphocytic inflammation is generally associated with viral infection. Serologic profiles would possibly help to define the viral disease burden. In summary these tissue changes are similar to those seen in the prior tissue submission by Dr Dammann and would be essentially what one would expect to see in a wild mouse population.

Grade: Normal = 0, Minimal = 1, Mild = 2, Moderate = 3, Moderately Severe = 4, Severe = 5

Table I-2. Plant codes, common names, and scientific names.

| Code | Common name | Scientific Name |
|-------------|--------------------------|------------------------------------|
| AGCR | Indian rice grass | <i>Agropyron cristatum</i> |
| ALAL | Yellow alyssum | <i>Alyssum alyssoides</i> |
| ALDE | Desert madwort | <i>Alyssum desertorum</i> |
| ARCA | Silver sagebrush | <i>Artemisia cana</i> |
| ARCO | Ballhead sandwort | <i>Arenaria congesta</i> |
| ARFR2 | Sandwort | <i>Arenaria franklinii</i> |
| ARTR | Wyoming big sagebrush | <i>Artemisia tridentata</i> |
| ASFI | Locoweed | <i>Astragalus filipes</i> |
| ASLE | Freckled milkvetch | <i>Astragalus lentiginosus</i> |
| ATCO | Spiny saltbush | <i>Atriplex confertifolia</i> |
| ATFA | Saltsage | <i>Atriplex falcate</i> |
| BASA | Arrowleaf balsamroot | <i>Balsamorhiza sagittata</i> |
| BRTE | Cheatgrass | <i>Bromus tectorum</i> |
| CADO | Douglass' sedge | <i>Carex douglasii</i> |
| CHDO | Dusty maiden | <i>Chaenactis douglasii</i> |
| CHNA | Grey rabbitbrush | <i>Chrysothamnus nauseosus</i> |
| CHVI | Green rabbitbrush | <i>Chrysothamnus viscidiflorus</i> |
| CRAC | Hawksbeard | <i>Crepis acuminata</i> |
| CRTO | Cryptantha | <i>Cryptantha torreyana</i> |
| DEPI | Western tansymustard | <i>Descurainia pinnata</i> |
| DESO | Tansymustard | <i>Descurainia sophia</i> |
| ELLA | Thickspike wheatgrass | <i>Elymus lanceolatus</i> |
| ERAL | Stalked fleabane | <i>Erigeron algidus</i> |
| EROV | Cushion buckwheat | <i>Eriogonum ovalifolium</i> |
| ERPU | Shaggy fleabane | <i>Erigeron pumilus</i> |
| ERSP | Great basin wooly star | <i>Eriastrum sparsiflorum</i> |
| GRSP (ATSP) | Spiny hopsage | <i>Grayia spinosa</i> |
| GUSA | Broom snakeweed | <i>Gutierrezia sarothrae</i> |
| ERRE | Stemless mock goldenweed | <i>Ericameria resinosa</i> |
| HAGL | Halogeton | <i>Halogeton glomeratus</i> |
| HOJU | Foxtail barley | <i>Hordeum jubatum</i> |
| IPCO | Ball-head gilia | <i>Ipomopsis congesta</i> |
| IVAX | Poverty weed | <i>Iva axillaris</i> |

Table I-2. (continued).

| Code | Common name | Scientific Name |
|-------------|-------------------------|---------------------------------|
| KOSC | Kochia | <i>Kochia scoparia</i> |
| KRLA | Winterfat | <i>Eurotia lanata</i> |
| LASQ | Stick-tights | <i>Lappula squarrosa</i> |
| LEPE | Clasping peppergrass | <i>Lepidium perfoliatum</i> |
| LEPU | Prickly phlox | <i>Leptodactylon pungens</i> |
| LUHO2 | Silvery lupine | <i>Lupinus holosericeus</i> |
| LUWY | Wyeth's lupine | <i>Lupinus wyethii</i> |
| LYSP | Spiny skeletonweed | <i>Lygodesmia spinosa</i> |
| MACA | Hoary aster | <i>Machaeranthera canescens</i> |
| MECA | Idaho bluebells | <i>Mertensia campanulata</i> |
| MESA | Alfalfa | <i>Medicago sativa</i> |
| OPPO | Prickly pear cactus | <i>Opuntia polycantha</i> |
| ORHY | Indian ricegrass | <i>Oryzopsis hymenoides</i> |
| PASM | Western wheatgrass | <i>Pascopyrum smithii</i> |
| PHHO | Hood's phlox | <i>Phlox hoodii</i> |
| PHLO | Longleaf phlox | <i>Phlox longifolia</i> |
| POSE | Sandberg bluegrass | <i>Poa secunda</i> |
| PSSP | Bluebunch wheatgrass | <i>Pseudoroegneria spicata</i> |
| RUOC | Western dock | <i>Rumex occidentalis</i> |
| SAKA | Russian thistle | <i>Salsola kali</i> |
| SCLI | Plains mustard | <i>Schoenocrambe linifolia</i> |
| SELA | Spearleaf stonecrop | <i>Sedum lanceolatum</i> |
| SIAL | Tumble mustard | <i>Sisymbrium altissimum</i> |
| SIHY (ELEL) | Squirrel tail grass | <i>Elymus elymoides</i> |
| SPMU | Globemallow | <i>Sphaeralcea munroana</i> |
| STCO | Needle and thread grass | <i>Stipa comata</i> |
| STSP | Thorn skeletonweed | <i>Stephanomeria spinosa</i> |
| STVI | Green princesplume | <i>Stanleya viridiflora</i> |
| TECA | Grey horsebrush | <i>Tetradymia canescens</i> |
| TESP | Spiny horsebrush | <i>Tetradymia spinosa</i> |
| TRDU | Yellow salsify | <i>Tragopogon dubius</i> |
